Summary

I strive to become a highly skilled front-end developer and to work in a friendly, result-oriented team of web-developers. Responsible and hardworking, I wish to master new technologies and tools. Creating and seeing results of my work is important for me. My main technology stack: HTML5, CSS3, JavaScript, React / Redux. I am a fast learner, responsible, and ready for tasks. I can work in a team to achieve results. I constantly strive to gain additional knowledge and improve my skills in the field of IT. Gained experience in three team projects during Full Stack Developer training at GoIT, which lasted from 2021-2022. I have been working on learning English for the last year. I read and use foreign YouTube channels. At the moment I am looking for a remote job, but it is also possible full-time job in Vinnytsya.
